DETAILED ACTION***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-14, drawn to an intraconnection on motherboard for computer system,
5 classified in class 710, subclass 100.

Group II. Claims 15-20, drawn to a bridging interface for converting communications
protocols, classified in class 710, subclass 315.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination and subcombination. Inventions in
10 this relationship are distinct if it can be shown that (1) the combination as claimed does not require the
particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility
by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed
does not require the particulars of the subcombination as claimed because the claimed limitations "a first
port for receiving a first communication protocol and for interfacing with an array in said first
15 communication protocol," and "a second port for receiving a second communication protocol and for
converting said second communication protocol into said first communication protocol" of the claimed
subcombination in the Group II are not required by the claimed combination in the Group I. The
subcombination has separate utility such as a communication protocol converter for bus bridging
interface. Because these inventions are distinct for the reasons given above and have acquired a separate
20 status in the art because of their recognized divergent subject matter, restriction for examination purposes
as indicated is proper.

3. A telephone call was made to Mr. Ronald L. Yin on 4th of January 2006 to request an oral
election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named
5 inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher E. Lee whose telephone number is 571-272-3637. The examiner can normally
10 be reached on 9:30am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rehana Perveen can be reached on 571-272-3676. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
